Children's Leukaemia & Cancer Research Foundation (Inc)

Mr Geoffrey CATTACH AO
(Chairman)

Mr Phil BRUCE
(Vice Chairman)

Mr Kim WILLIAMSON
(Secretary/Treasurer)

Mr Justin BRUCE

Mr David CATTACH

Professor Cathy COLE
(Nominee of Princess Margaret Hospital)

Mr David FALCONER

Mr Bob FAWCETT

Ms Natalie HIDDLESTONE

Professor Ursula KEES
(Nominee of Institute for Child Health Research)

Mr Michael PARKER

Mrs Valerie STOPP

Founder

Mr Peter HARPER

Trustees

Mr Geoffrey CATTACH

Professor Ursula KEES

Mr Kim WILLIAMSON

Administration Staff

Mrs Andrea ALEXANDER
(Executive Officer)

Mrs Wendy KEARNS
(Executive Assistant)

Miss Katelyn LUSH
(Receptionist)

It is with pleasure that I once again report to members on the operations of the Children's Leukaemia & Cancer Research Foundation (Inc) for the year ended 30th June 2013.

Finance:

It is also a pleasure to report that the year under review we achieved an operating profit of \$935,642 against a budgeted expectation of \$330,000.

This is an outstanding result however, in respect to the specifics of the overall financial position I will leave that to the Treasurer to report on in greater detail regarding our operations for the past year.

Block Grant Funding:

We have completed the first year of our new block grant application for 2012 - 2015 - the 11th triennial block grant that we have funded - titled "Therapy & Molecular Genetics of Leukaemia in Infants" amounting to \$1,405,626.

We once again congratulate Professor Ursula Kees and her wonderful research team on their continued outstanding achievements both locally and internationally.

\$1M Recognition of Excellence Funding Grant:

We have now completed the first year of our second five year \$1M Recognition of Excellence Grant titled "Molecular Genetics of Childhood Tumours".

It was six years ago, as a result of excellent peer group reviews, that our Foundation provided additional funding of one million dollars to Professor Kees to allow another direction of research to be undertaken. Now a further \$1M has been provided by the Foundation.

CLCRF Fellowship:

This fellowship grant, awarded to Dr Alex Beasley to carry out research into "Targeting Therapy and Disease Outcomes in Paediatric Cancer", has been completed.

The Foundation's Committee of Management approved an application, to renew Dr Beasley's CLCRF Fellowship to carry out research into "Targeting Therapy and Disease Outcomes in Paediatric Cancer" over the next three years, requesting total funding of \$557,167.00.

Woolworths WA Children's Leukaemia & Cancer Research Fellowship:

This fellowship, funded at a cost of \$400K, is in recognition of the incomparable support that this Foundation receives from Woolworths WA.

Dr Mark Cruickshank, Senior Research Officer, has now completed his first year of the grant project titled "Identifying the Molecular Abnormalities in Childhood Leukaemia to Improve Treatment".

Woolworths WA:

It is with sadness I announce that, after a wonderful association that has lasted 30 years, Woolworths WA have formally advised us that their support is now concluded and they are moving in a different direction.

However, rather than being sad, it is, in fact, a celebration of how fortunate we have been to have this exceptional support over this long period of time and to have received over \$3.7 million which has been the mainstay of our research endeavours.

We will be forever grateful to the management and staff of Woolworths WA as will the many children who have been affected by leukaemia and other cancers and now lead normal lives.

It will be the Foundation's pleasure to continue recognition of Woolworths WA through the afore-mentioned Woolworths Research Fellowship.

Community Activities:

We continue to be amazed at the wonderful and diverse support that we receive from schools, colleges, businesses and corporations, clubs and societies and the community at large.

To all of these benefactors, large or small, we value your support and the part you are playing in ensuring young children are getting the best opportunity in life.

Our Executive Officer will individually acknowledge the majority of contributors in her report however I would like to mention the continued support of the South West Bike Trek that has now become an annual institution throughout the south west of our State.

Telethon Institute for Child Health Research:

I am pleased to once again acknowledge our wonderful relationship with the Telethon Institute for Child Health Research, the entity which administers the Children's Leukaemia & Cancer Research Laboratory and allows the research which we fund to actually happen.

During the past year we have formalised our funding partnership and, in particular, our "Research Grant Guidelines" by developing a new Memorandum of Understanding between the Institute and our Foundation.

Patron:

Justin Langer has proved on many fronts that he is a person of great integrity and has been an outstanding achiever in whatever he undertakes whether it is on the cricket field or as a proud and passionate family man.

We were extremely fortunate to have Justin accept the position of our first Patron and it is no surprise that he still holds this position. Notwithstanding his many commitments he has always given his support to the Foundation whenever called upon.

I am pleased to announce that Justin has agreed to continue in this role for the next 12 months.

Governance Issues:

During the past year the Foundation has undertaken to address governance issues in particular with regulations with the new ACNC Act (Australian Charities & Not for Profit Commission) and the drafting of a new Constitution which requires updating after 30 years and compliance with the ACNC Act.

It is pertinent to note that the purpose of the ACNC is to set out a minimum standard of governance and to promote public trust and confidence in registered charities.

We are particularly indebted to Allion Lawyers who have gratuitously undertaken to oversee the drafting of a new constitution and to ensure compliance with all statutory authorities.

It is expected that the draft will be finalised and signed off by the ATO in the next two months and that an extraordinary general meeting of members will be called to adopt the new constitution.

Marketing Strategy & Development:

Over the past 30 years the Foundation has evolved from a small fundraising group to support research into childhood leukaemia and allied disorders to a more than significant charitable organisation with a recognisable 'brand' and developing corporate relationships.

This evolution was perfectly eulogised in "Reflections of the Past 30 Years" forwarded to all members last year.

Given the current marketplace, the Committee of Management were mindful of the need to continue to create, manage and coordinate all of the Foundation's Marketing, Branding, Promotion and Public Relations requirements on a professional level and, after evaluating options, I am pleased to announce the appointment of "Absolute Edge Media" as our consultants in these extremely important areas of activity.

Accordingly I welcome Kylie Dalton, the principal of Absolute Edge Media, to our team confident in the knowledge that you will assist us to keep the Foundation's brand to the forefront in the future and help identify and develop new corporate, community and media relationships.

Foundation Staff:

I wish to personally extend my appreciation to our staff and, in particular, to Andrea, Wendy, and more recently, Katelyn, whose dedication and loyalty far exceeds their conditions of employment and at the same time are wonderful ambassadors for the Foundation.

Committee of Management:

I also wish to extend my appreciation to the dedicated and enterprising members of our Committee of Management who give freely of their time and provide outstanding business acumen.

In particular I would like to take the opportunity to publicly acknowledge the unwavering service provided by Kim Williamson over the many years. Kim's knowledge and experience, as well as the support he provides, is invaluable.

One of the hallmarks of our committee over a long period of time has been stability however time does have its own influence. Recently we regrettably accepted the resignations of two stalwarts in Bob Fawcett and David Falconer.

Both have given outstanding service and both can be proud of their individual roles in what has been achieved by the Foundation.

At our last Committee of Management meeting I am pleased to announce that Kimon Anderson was appointed under the constitutional entitlement to fill a casual vacancy.

Kimon brings a wealth of business experience to our Committee of Management and will be a more than worthy addition to our team.

Conclusion:

Over the past 30 years our Foundation has raised over \$24.5M and it is a source of inestimable pride that our research team has made wonderful advances in the treatment of childhood cancers, our membership continues to grow and best of all we contribute towards the saving of young lives and give them the opportunity of a future.

To all of you who have supported and contributed to this success, please accept of sincere thanks and grateful appreciation.

Geoffrey R Cattach AM, Chairman November 2013

I am pleased to report to the Members of the Children's Leukaemia & Cancer Research Foundation (Inc) for the financial year 2012/2013.

Corporate Benefactors

Woolworths (WA)

The rain, lightning and thunder certainly didn't keep people away from the Woolworths Night at the Cannington Greyhounds on Saturday 24 November, 2012.

But the weather did eventually clear and a lovely evening was enjoyed by all. There was lots of entertainment for the children and the much anticipated Woolworths show bag, filled with goodies, was received with delight.

During the evening Brad Bolin, Regional Manager of Woolworths (WA) presented the Foundation's Chairman with a donation of \$408,548 from the 2012 Fresh Food Kids Hospital Appeal. A special note of thanks to Mr Bolin for his lengthy support of the Foundation and we wish him all the best for his move to Queensland.

Stores which raised the most during the appeal were Karratha, Gateway, Mandurah Forum, Joondalup, Waikiki, Bentley, Belmont, Brooks Garden, Karrinyup, Port Hedland, Carramar, Kingsway, Katanning, Livingston, Morley, Secret Harbour, Eaton Fair, Kwinana, Rockingham City and Carnarvon.

As already mentioned by our Chairman, in his report, Woolworths WA had formally advised us that their support is now finished. We will be forever grateful to the wonderful Staff & Customers of Woolworths for their amazing support over the many years.

Wellard Group

A big thankyou to Wellard Rural for their charitable donation of \$44,080. These funds were raised at their annual Xmas function silent auction, which Wellard generously then matches dollar-for-dollar.

Benefactors

♥ Deceased Estates:

Ashcroft Ruby - VIC	\$250,000
Beruldsen Margaret - VIC	\$5,000
Cahill Albert - NSW	\$150,000
Carbery Ruby - NSW	\$ 5,000
Coleman Dorothy - NSW	\$ 10,000
Down Francis - WA	\$180,000
Eddy Clara - WA	\$9,000
Fitzpatrick Eileen - NSW	\$67,807
Lockyer Robert - VIC	\$14,710
Neely Stewart - NSW	\$10,000
Oliver Jean - WA	\$5,000

The Foundation was not aware of some of these generous legacies until the benefactors had passed away.

♥ Tate Family Foundation \$20,000

This donation represents the second year of the Tate Family's commitment towards the has \$1M Recognition of Excellence grant.

♥ Verve for Life NSW - \$15,298

A Winter Masquerade Charity Ball was organised by Verve in July 2012. Particular thanks to Kellie Schofield and to Nathan Walshe and to the many businesses that supported the event.

♥ Austvending PL (SA) - \$13,260

These funds represent donations from the franchise owners of the Austvending confectionary machines, placed throughout Australia.

♥ Stan Perron Charitable Foundation - \$10,000

Mr Perron and his Foundation have been very charitable supporters of the Foundation for many years.

♥ Phyllis M Ferguson - \$ 10,000

Mrs Ferguson is a new supporter of the Foundation. We greatly appreciate her support.

To these generous individuals and organisations we extend our sincere thanks for their dedication to our Foundation. There were many others who provided personal support and financial assistance during 2012/2013. We also thank them for their generosity. Donations of \$100 and above are listed elsewhere in this report.

School/College Support

♥ Christ Church Grammar - Romsey House	\$2,817
♥ Applecross Senior High School	\$1,000
♥ Lake Gwelup Primary School	\$938
♥ Glengarry Primary School	\$340
♥ Upper Swan Primary School	\$198
♥ Upwey High School	\$57

We thank these schools, their students and staff for their support. In particular, special thanks to Romsey House at Christ Church Grammar, for their long-standing commitment to the Foundation.

Tele-Marketing Raffles

The Foundation completed three raffles during the year ending June 2013. Revenue from these raffles totalled \$713,754 which, after, deducting expenditure of \$484,308, resulted in a profit of \$229,445. Donations received via the raffles are included in the revenue figure.

Our raffles continue to be successful not only from a financial aspect, but they also help to increase our profile in the community around Australia. We currently have approximately 50,000 supporters on the raffle database.

The Royal Life Saving Society WA (RLSWA), through its call centres in Manjimup and Bridgetown, continue to undertake our telemarketing calls and the Hello Call Centre look after the administration of the raffle funds.

We extend our thanks to the RLSWA, as they continue to conduct our raffles on a cost recovery basis and make no profit from the Foundation's raffles.

Donation Appeal Campaigns

From each raffle campaign the Foundation has been able to establish a database of donors in addition to raffle supporters. A donation appeal was sent to the donor database twice in 2012/13. The donation appeals have been based around a Xmas appeal and a Tax Time appeal.

Both campaigns have been very successful and represent an effective complimentary fundraising program to the raffles. Net cash received from the campaigns was \$89,938. These campaigns are sent to approximately 6,000 supporters.

2012 South West Bike Trek

The trek, which started in Mandurah and ended in Augusta, was held from the 15-20 October 2012 with up to 25 riders competing the full distance.

Students from Harvey Primary School and other schools in the region also participated on various legs of the ride.

Support was received from many service clubs, in particular the Rotary Clubs of Pinjarra and Margaret River and the Lions Club of Leewin. Thanks also to the many shires who donated and supported the event. A total of \$69,126 was raised during the 2012/2013 period.

2013 Family Concert

Our fifth Family Concert was held in March at Houghton Winery. Those that attended were entertained by Absolute Kylie, Diamond - The Neil Diamond Tribute and children's entertainer Clare Stace.

The concert would not have been possible without the wonderful support from Houghton Winery, BBC Entertainment, Reeces Structures, Hello Call Centre/RLSWA and Australian Protective Services. Thanks also to Awesome Balloon Creations, Marie Gee, Matt Brenner and family, Swan Valley Animal Farm and the Face Painting Ladies.

Through ticket sales and donations a net profit of \$6,222 was achieved. It has never been our intention to make huge amounts of money from this event – but to afford our members and supporters a great day out for an inexpensive price and to lift our profile within the community. We hope our 2014 will be just as enjoyable.

A Flame for Aline - Flash Mob 2012

The Flame for Aline event was created to honour the life of a young lady who passed away from leukaemia that same year. It was a celebration of her life and what dance and friendship meant to her.

The Foundation was chosen as the charity to benefit from the event. On Tuesday 11 December 2012 at Forrest Chase in the Perth CBD, approximately 700 people joined together, with the Perth Lord Mayor Lisa M Scaffidi, to remember Aline. Channel 7's Today Tonight also produced a story about the Flash Mob the next night and videos posted on You Tube have had over 8,500 views. Our thanks to the amazing group of people that put this together, in particular to Kylie Dalton – who promised to make this happen and did!

Foundation Updates

Only one edition of the Foundation Update was published during the period under review. The creation of the newsletter is made possible with the generous support of Bob and Jan Fawcett of Ultra Printing, Marketing and Publishing Services.

Bob continues to produce a high quality publication under tight budget restraints and the Foundation is most grateful.

Website/Social Media

Our website continues to be visited by people from around the world and is a very useful tool in building our profile in the community at large. We would like to acknowledge Phil Solomon of Topshelf who maintains our web site at no cost to the Foundation.

The Foundation now has Facebook <https://www.facebook.com/CLCRF> and Twitter <https://twitter.com/CLCRF> accounts. These have proved to be of benefit to our organisation and great way to let people know what is happening at the Foundation.

Membership

At the time of writing this report we have 634 active members. Although we have had new members join, unfortunately some of our existing members have passed away.

Fund Raising Platforms

During the year under review support for the Foundation has continued to come from everywhere. Our fundraising profile has been intensified via the online fundraising entities such as Everyday Hero, Go Fundraise and My Cause. Funds raised via these organisations amounted to over \$42,048 during 2012/13. These third party fundraising platforms are an excellent way for people to support a cause.

There were many people who raised funds for the Foundation via these platforms. We thank them ALL for choosing to support the Foundation. Space does not allow us to acknowledge everyone, but I would like to make mention of a few people:

Dean Keighran	\$8,910	Shaving his Dreads - own event
Elizabeth Aouns	\$5,695	Sydney Morning Herald Half Marathon
Jones Family & Friends	\$3,796	HBF Run for a Reason
Lauren	\$2,170	Skydive 4 Kids - own event
Melina Argyle	\$2,169	Sydney Morning Herald Half Marathon
Brendan Fitzgerald	\$2,000	Keep Calm & Donate – own event

Thank you to the multitudes of family, friends and colleges who have supported these inspirational fundraisers.

Conclusion

Another year has flown by and we have been in our new home for over two years.

At the beginning of 2013 we welcomed our new receptionist, Katelyn Lush to the Foundation Family. Katelyn has settled in well and we are delighted to have her on board.

In March 2013 Wendy and I attended the Fundraising Institute of Australia's international conference in Sydney. For not-for-profit organisations, attendance at these conferences is essential to stay in touch with the industry and to network with peers. Wendy and I thank the Committee for their support of this professional development.

I would like to recognise my Executive Assistant, Wendy Kearns, for her efforts during the past year. Wendy is a wonderful work colleague and her support has been truly appreciated.

My sincere thanks also to the Board of Management for their support and guidance during 2012/13. It is truly a privilege to work for such a dedicated group of people.

I would like to take this opportunity to wish everyone a very Merry Christmas and a safe and peaceful 2014.

Andrea Alexander

While the survival rate for patients with childhood leukaemia has improved dramatically, approaching 5-year survival of 95% for some patient groups, several sub-types of leukaemia are refractory to current treatments. Furthermore, in cases where treatment is successful, the toxicity of the drugs results in severe acute side effects and long-term morbidity. Strikingly, in patients less than three months at the time of diagnosis, the survival rate is only 30%. In many studies more intensive therapy was administered to infants with leukaemia to improve survival. Unfortunately, this led to a large number of toxic deaths, and did not improve overall survival. We urgently need to find novel therapy for these patients. Since treatments using highly toxic chemotherapies are not successful, understanding the biology of this disease holds the key.

In this study, we have generated a panel of 8 cell lines from patients with infant acute lymphoblastic leukaemia (iALL). We have performed genetic analyses using state-of-the art next generation sequencing technology (RNA-seq and exome-seq). Cell lines and primary iALL specimens from which they were originally derived were investigated. These studies were performed to gain novel insights into the genes that contribute to iALL disease progression and drug resistance. We confirmed the presence of a translocation at the MLL gene in iALL specimens and cell lines, which is known to confer poor prognosis for patients. We also found that infant patients inherited extremely rare polymorphisms in genes that are known to play a role in cancer. Importantly, these molecular studies identified several known cancer-causing genes as well as novel genes; many of which can be targeted by modern therapies to improve treatments of patients with iALL.

In addition to characterizing the genetic profile of iALL specimens and cell lines, we have screened the panel of iALL cell lines against 101 approved cancer drugs, which is the first comprehensive assessment that examined the drug response in iALL. The information obtained clearly showed that some of the currently used drugs did not kill iALL cells (e.g. Mercaptopurine and Methotrexate), while others were very effective, yet not used in contemporary protocols for patients (e.g. Romidepsin and Bortezomib). In addition, we have tested modern compounds that are presently in clinical trials for various cancers. These compounds are highly specific as they target particular genes that are altered in leukaemia cells. Therefore, these “targeted” drugs offer the potential to kill leukaemia cells with less toxic effects to the patient. Together, these studies have identified drugs that could be useful to treat iALL, including established anti-cancer drugs as well as new-generation drugs. These drugs are expected to provide great benefits in the treatment of patients with iALL.

These and other studies have generated a number of research publications and have allowed us to leverage additional government funding to support the work. These details are provided below:

Additional Funding Leveraged:

- NHMRC Project Grant ID1011499 (2011-2014): Targeting drug-resistance in childhood leukaemia (Kees UR, Lock RB, Beesley AH, \$626,732).
- NHMRC Project Grant ID1007586 (2011-2014): The role of connective tissue growth factor in the pathobiology of lymphoid tumours and response to therapy (Kees, UR, Beesley AH, Charles AK, \$601,732).

Million Dollar Recognition Award (2012 - 2017) Professor Ursula R Kees

Title: Molecular Genetics of Childhood Tumours

'NUT Midline carcinoma' or NMC, is a little known but extremely aggressive cancer that can affect people of any age, including children and newborn babies. Unlike leukaemia, this cancer arises in tissues of the lung, or throat, or abdomen, but not the blood. It is very rare but a number of children with NMC have been treated at Princess Margaret Hospital over the last 20 years. Unfortunately there is currently no effective treatment for NMC, and patients typically survive less than one year. The first report of this rare disease was published by Professor Kees in 1991, and our team of researchers continues to be one of only very few laboratories in the world studying the biology and treatment of NMC. There is only one recorded survivor of this disease and patients typically succumb within a matter of months. The rarity of the cancer, together with its aggressive clinical course, means that doctors have had little chance to develop effective strategies to treat patients. Treatments have essentially been adapted from protocols given to patients with similar cancers. Clearly this is not working for the patients. There are a large number of 'conventional' chemotherapy drugs available to treat such patients, but to date there has been no evidence to guide doctors as to which drugs might be effective. Thanks to the efforts of the team supported by CLCRF, we now have a small panel of cell lines from these rare patients, and they are ideally suited to determine the effectiveness of drugs. We included currently available cancer drugs as well as novel drugs in our screen. We could demonstrate that several of them have excellent activity against NMC. We plan to evaluate whether particular drug combinations would be of benefit, and endeavour to examine them in model systems. Using state-of-the-art genetic analyses to correlate these drug sensitivities to the genetics of each patient will allow us to generate further clues to understand the biology of this disease. The information obtained will be applied to the design of improved treatments.

Carter T, Charles AK, Murch AR, Beesley AH, Kees UR. A review of NUT-midline carcinoma prevalence at a Western Australian Paediatric Hospital, submission anticipated February 2014.

Dr Beesley has been employed within the CLCRF Laboratory in the Division of Cancer and Leukaemia Research since 2003, and was awarded the inaugural CLCRF Research Fellowship in July 2010. This three-year Fellowship provided support for Dr Beesley to conduct research detailed under the CLCRF Triennial Block Grant and the Million Dollar Recognition Awards. He has been involved in all aspects of the leukaemia research program and the management of staff and students during this time. In these studies we have been investigating the ways in which patients with leukaemia become resistant to certain therapies, in particular steroids such as dexamethasone. This class of drugs is one of the most important for the treatment of the disease and yet some patients develop resistance, which can lead to relapse. Our studies using bone marrow cells from leukaemia patients (grown in the test tube to generate cell lines) have helped us to identify some of the mechanisms associated with the development of steroid resistance. This includes specific changes to the metabolism of the cancer cells, which alters the way in which they use nutrients, for example sugar.

We are currently investigating these changes in greater detail using modern biochemical methods at the University of Western Australia, and also collaborating with researchers at the Children's Cancer Institute Australia in Sydney to identify new drugs that may be used to overcome steroid resistance in patients who have relapsed.

A second part of this study has been the development of 'biomarkers' that can help in the early identification of leukaemia patients that are at risk of relapse. To achieve this we have studied the gene profiles of a group of patients and identified particular patterns that are predictive of good or inferior clinical outcome. The accurate identification of patients at risk of relapse can improve treatment protocols for patients, tailoring the amount of therapy they receive to their level of risk. This improves not only cure rates, but also minimises secondary side effects of chemotherapy. In addition these gene models have identified drugs that may be of particular benefit in certain patient groups. More recently Dr Beesley has become team leader for the 'NUT midline carcinoma' program, which is described more fully under the Million Dollar Recognition Award.

As part of his Fellowship he has co-written two successful NHMRC Project Grant applications and has applied to the NHMRC for additional funding to support the NMC research program. He has published 8 journal articles during his Fellowship describing the results of his research, with four others under submission. He has been responsible during his Fellowship for presenting research from the laboratory to community groups and scientific audiences, both in Australia and overseas, acknowledging the support from the CLCRF at each opportunity. In 2013 he was successfully awarded two CLCRF Project Grants and a three-year extension to his Fellowship.

Findings from research conducted during Dr Beesley's Fellowship have been presented in the following scientific forums and community groups:

- The European Association for Cancer Research Conference, Cambridge, UK (2013)
- The 'Beyond the Genome' Conference, San Francisco, USA (2013).
- The American Society for Human Genetics, Boston, USA (2013).
- The Australian Society for Biochemistry and Molecular Biology (ASBMB) Annual Symposium, Fremantle, WA (2012).
- 4th New Directions in Leukaemia Research Conference, QLD (2012).
- New Directions in Child and Adolescent Health Symposium, PMH (2012)
- Children's Cancer Institute Australia (CCIA), Sydney (2012).
- The Lorne Cancer Conference, Victoria (2010, 2012, 2013).
- 28th Annual Genes & Cancer Meeting, Warwick, UK (2011).
- Keystone Symposium 'Omics Meets Cell Biology', Alpbach, Austria (2011).
- The Perth Cancer Club, WAIMR (2011).
- The Cancer Council WA Symposium, Perth, WA (2011 & 2013).
- 21st Meeting of the European Association for Cancer Research, Oslo, Norway (2010).
- The Lowy Symposium: Discovering Cancer Therapeutics, Sydney (2010 & 2012).
- American Association for Cancer Research 101st Annual Meeting, Washington, USA (2010).

- Combined Scientific Meeting of the Australasian Association for Clinical Biochemists and Australian Institute for Medical Scientists, Perth (2010).
- Rotary-Lions Club South West Bike Trek Fundraiser Dinner, Bunbury (2010) and Pinjarra (2012 & 2013).

Together these studies have generated a number of important research publications and have allowed us to leverage additional funding to support the work:

Additional Funding Leveraged:

- NHMRC Project Grant ID1011499 (2011-2014): Targeting drug-resistance in childhood leukaemia (Kees UR, Lock RB, Beesley AH, \$626,732).
- NHMRC Project Grant ID1007586 (2011-2014): The role of connective tissue growth factor in the pathobiology of lymphoid tumours and response to therapy (Kees, UR, Beesley AH, Charles AK, \$601,732)
- CLCRF Research Fellowship (2013 - 2016): 'Targeting therapy and disease outcomes in NUT Midline Carcinoma' (Beesley AH, \$557,167)
- CLCRF Project Grant (2014): 'Morpholino Therapy for Childhood Cancer' (Beesley AH, \$113,135 over 1 year)
- CLCRF Project Grant (2014): 'Finding the Most Effective Therapies For Midline Carcinoma' (Beesley AH, \$111,637 over 1 year).

Woolworths Research Fellowship (2012 - 2015) Mark N Cruickshank

Title: Identifying Molecular Abnormalities in Childhood Leukaemia to Improve Treatment

Dr Cruickshank has been employed within the CLCRF Laboratory in the Division of Cancer and Leukaemia Research since 2012, and was awarded the Woolworths CLCRF Research Fellowship. This Fellowship has enabled Dr Cruickshank to conduct research aimed at improving risk assessment and treatment of infant and childhood leukaemia. These studies have utilised state-of-the art "genomic" technologies, providing comprehensive characterisation of genetic alterations conferring drug resistance. The unique resources, including patient specimens and cell lines generated within the CLCRF Laboratory, have been used to identify specific genes that are altered in infant and childhood leukaemia and which may confer resistance to conventional therapies.

These studies have identified potential 'biomarkers' that could predict drug sensitivity/

resistance. The 'biomarkers' under investigation include gene mutations, and alterations in chromosomes and levels of gene-expression.

Dr Cruickshank's work on paediatric leukaemia has identified a class of enzymes that may be involved in resistance to the drug flavopiridol. Using leukaemia cells selected for drug resistance, "genomic" analyses identified mutated genes that encode enzymes that metabolize flavopiridol. Furthermore, analysis of gene expression induced by flavopiridol, identified enzymes involved in neutralizing and eliminating drugs that were activated after drug treatment. Taken together, these results have defined genes that may represent 'biomarkers' of drug resistance and targets for therapy in drug-resistant leukaemia.

As part of his Fellowship, Dr Cruickshank has been involved in experimental design, data analysis and manuscript preparation for projects on infant ALL and childhood ALL, detailed under the CLCRF Triennial Block Grant and the Million Dollar Recognition Awards. In addition, Dr Cruickshank has successfully built collaborations with industry, including negotiations with GlaxoSmithKline and Beijing Genome Institute, and academia locally (University of Western Australia and The Harry Perkins Institute of Medical Research) nationally (Murdoch Children's Research Institute) and internationally (Harvard Medical School, USA; National Institute of Genomic Medicine, Mexico; University of British Columbia, Canada). These collaborations have resulted in the provision of costly drugs for testing, expertise in experimental design and complex data-analyses. Dr Cruickshank has presented research from the Laboratory to community groups and scientific audiences both in Australia and overseas, acknowledging the support from the CLCRF at each opportunity.

Findings from research conducted during Dr Cruickshank's postdoctoral appointments have been presented in the following scientific forums and community groups:

- The 'Beyond the Genome' Conference, San Francisco, USA (2013).
- The American Society for Human Genetics, Boston, USA (2013).
- Cancer Epigenomics Cell Symposium, Sitges, Spain (2013)
- Telethon Institute for Child Health Research Seminar, Perth (2013)
- Perth Cancer Club, Perth (2013)
- Children's Leukaemia & Cancer Research Foundation meeting (2013)
- Lorne Genome (2013)
- WA Genomics & Epigenomics interest group, UWA, Perth (2012)

STATEMENT BY THE COMMITTEE OF MANAGEMENT

The Committee Members have determined that the Foundation is not a reporting entity, and that this special purpose financial report should be prepared in accordance with the accounting policies outlined in Note 1 to the financial report.

In the opinion of the Committee of Management, the accompanying financial reports:

1. (a) The accompanying Operating Statement gives a true and fair view of the surplus of the Foundation for the financial year; and
(b) The accompanying Balance Sheet gives a true and fair view of the state of affairs of the Foundation as at the end of the financial year.
2. At the date of the statement there are reasonable grounds to believe that the Foundation will be able to pay its debts as and when they fall due.

This statement is made in accordance with a resolution of the Committee of Management and is signed by and on behalf of the Committee of Management by:

.....
Executive Officer – Andrea Alexander

.....
Treasurer – Kim Williamson

Date: 20/11/2013

INDEPENDENT AUDIT REPORT

To: The Management Committee, Children's Leukemia & Cancer Research Foundation (Inc)

SCOPE

We have audited the Financial Report for the Children's Leukemia & Cancer Research Foundation (Inc) for the year ended 30 June 2013. The Management committee is responsible for the Financial Report.

Our audit has been conducted in accordance with Australian Accounting Standards. Our procedures include examination on a test basis, evidence supporting and other disclosures in the Financial Report. These procedures have been undertaken to form an opinion whether, in all material aspects, the Financial Report is fairly presented.

The audit opinion expressed in the report has been formed on the above basis.

QUALIFICATION

As is common with organizations of this type, it is not practical for Children's Leukemia & Cancer Research Foundation (Inc) to maintain an effective system of internal control over donations and other fund raising activities until their entry in the Accounting Records. Accordingly our audit in relation to fund raising was limited to the amount recorded.

QUALIFIED AUDIT OPINION

In our opinion, except for the effect of such adjustments, if any as might have been determined necessary had the limitation discussed in the qualification paragraph not existed, the Financial Report presents fairly and in accordance with applicable Accounting Standards, the financial position of Children's Leukemia & Cancer Research Foundation (Inc) at 30 June 2013.

NOTE 1 - Statement of Significant Accounting Policies

The significant accounting policies which have been adopted in the preparation of this financial report are:

Basis of Preparation

The Financial Report is a special purpose financial report, which has been prepared to meet the requirements of the Management Committee to provide information to the Children's Leukaemia & Cancer Research Foundation (Inc). The Foundation is not a reporting entity and is not obliged to adhere to the mandatory reporting requirements of the Australian Accounting Standards. Notwithstanding the special reporting status of the foundation, the Management Committee have, unless otherwise stated followed generally accepted accounting principles in accordance with Australian Accounting Standards. The accounts have been prepared on the basis of historical costs and do not take into account the changing value or fair value of non-current assets. The Accounting policies are consistent with those prepared in 2012.

Taxation and GST

Children's Leukaemia & Cancer Research Foundation (Inc) is an income tax exempt body.

The Net amount of Goods and Services Tax and GST recoverable from or payable to the Australian Taxation Office is included as a current asset or liability in the Balance Sheet.

Revenue, Expenses and Assets are recognised net of GST.

Employee Entitlements

The amounts expected to be paid to employees for their pro-rata entitlement to long service leave and annual leave are accrued annually at current pay rates.

Donations \$100 & Above 2012/2013

Many generous people and organisations gave to the Foundation during July 2012 - June 2013. We have tried to make the following list as accurate as possible but please forgive us if we have omitted details of your gift. Space does not permit us to list the numerous other donations given
